There is one house in Sterling place Brooklyn, that promises some surprises to the first burglar that attempts to enter it. Upon opening the front door the visitor is confronted by a Gatling gun in perfect working order. At the top of the first flight of stairs is a one-pounder, and at least a dozen other pieces of artillery occupy unexpected places throughout the building Every part of the residence suggests trouble for the unwelcome. The occupant is an inventor of explosives, and he explained to a visitor that he had never counted upon the formidable looking ornaments as of protec-tive value. "The real protection," he ex-plained, "lies in the things unseen."

Wherever there is building going on, and all the outlying sections of at least three of the boroughs ring with the hammer of the carpenter all day long, one may see the bush on a gable end of almost every new frame house that has taken on at least the skeleton of its definite form. As soon as the ridgepole has been set in place upon the rafters some one of the carpenters is sure to tack into place a bush or a branch from a tree. There it remains and withers until the roofers reach it with their shingles. An antiquary relates that the custom is universal among the carpenters of northern Europe and has so respectable a history that it may well be derived from the Druids. It is by nature a luck charm, something to avert the evil that might be built into the fabric of the hore. It is explained that if fabric of the home. At first the noise was maddening. I appealed to the Health Board in vain, and finally nature came to the rescue by permitting me to sleep through it all. Once you get so that you can sleep while your neighbors beat carpets, a little thing like the Fourth of July celebration cannot annot you."

Many have noticed that in the United States Army, as well as in the regiments of the National Guard, the letter "J" is omitted in the designation of the companies, the letters jumping from "I" to "K." The reason is often given as the dislike a man has to being in the "Jay" company, but that is not the case.

The letter "J" was introduced in the English alphabet about 1630. Before that the sound had been represented by the letter "I," which was thus made to do double duty. The same was the case in the written language, and in the last century "I" and "J" were written exactly the same. About written exactly the 1850, however, the innovation was made of writing "J" with the bottom loop below the line.

It is a trifle out of the way, but the pedestrian therein has the advantage of being allowed to walk on the grass, which is much more restful than tramping on pavements. Between Seventy-second and 125th streets in Riverside are numerous long stretches where one may stroll at ease on soft, springy turf, only descending to stony pavements when the bank becomes too steep for comfortable footing.

Nothing could equal the apologetic attitude of all the salespeople in the shops nowadays. "It's so late in the season, you know." they begin, and add, "Everything has been sold."

This has its effect in disciplining the cus tomer who has dared to postpone purchas ing until such a late date. It is in the bonnet shops where the prices have been reduced that this attitude is most impressed on the buyer.
"What in the world did you mark down

TEACHERS ROAM NEW YORK.

SPEND THE DAY HERE AFTER THEIR JERSEY CONVENTION.

Many Hear Lyman Abbott Preach at Columbla-City History Club Shows the Points of Interest-Internal War and "Machine Rule" in the Association.

New York was swarming yesterday with the teachers who had come up from the convention at Asbury Park. There were fully five thousand of them here. Some went to Columbia University to hear Dr. Lyman Abbott preach in the morning, others thronged the museums and still others were conducted to points of interest uptown and downtown by members of the City History Club, who explained and lectured as they went.

The conductor of a Broadway car which took a group of Missouri schoolma'ams downtown will not soon forget the pretty miss who turned toward him as he snapped out a "Step lively!" and retorted: "Young man! In our country the conductors have to wait for us. So will you!" The collector of fares subsided on the instant.

The immensity of New York none of them could fully grasp. One young woman who rushed in upon John T. Nicholson, who is in charge of the teachers' headquarters, in the Fifth Avenue Hotel, at 1 o'clock in the afternoon announced that she desired to see Coney Island, Central Park and the Brooklyn Bridge, and return

Park and the Brooklyn Bridge, and return at 4 o'clock.

The big gymnasium at Columbia University was well filled with teachers when Dr. Abbott preached in the morning. His subject was "Religion," and he told the teachers that they must get the spirit of religion into their work before they could teach with full effect.

Miss Margaret Haley, who is the business representative of the Chicago Teachers' Federation, issued in the afternoon a long statement about the dispute in the annual business meeting of the National Educational Association on Thursday. She represented a body, she said, that wanted the association to remain within the control and be administered in the interest of the thousands of teachers who contribute its income. She compared the situation to income. She compared the situation to the situation in the Equitable society, where "public opinion demanded that the institution should be administered in the institution of the policyholders instead of institution should be administered in the interests of the policyholders instead of in the interest of a clique of officers and directors who have long been fattening on the profits that legitimately belong to the stockholders."

stockholders."

"We want the association to remain mutualized," she said. She said that there was machine rule in the association. She declared that President Harper of the "Standard Oil University" as she referred to the University of Chicago, was the power behind the throne. She concluded her statement as follows:

"Don't be alarmed. It's only an infant lepidopter," says the park cop. "The only harm he can do is to tickle."

It is easy now, as it hasn't been often in summer, to find an unoccupied bench under a large tree whose outspreading branches cast a fine cool shade. Many a woman seeing the empty bench will hasten to it and sit down, but she won't stay there long. A caterpillar is sure to find the meshes of a peekaboo waist, and then the trouble begins.

The insects have made the trees unsightly. The white cocoons fill the interstices of the bark on the trunks and larger branches as thickly as holes in a sieve. There was not room enough on the trees apparently, for the cocoons cover much of the space on the stone wall skirting the park on Fifth avenue and Central Park West. The usual appearance of the stone wall is changed to a white mottled surface.

All of the caterpillars have not yet come All of the caterpillars have not yet come out. There are enough crawling about already to make much trouble, but it is said that when they are all hatched out by the beginning of August they will have the park very much to themselves, so far as visitors are concerned. They have not as yet done much damage to the foliage, as their growth has not got to the point where they do much eating, but they will unless the spraying gang gets busy and murders them in the egg. They are already beginning to strip the plane trees in Brooklyn.

ARRESTED THE BRIDEGROOM. After the Wedding Polleeman Couldn't Collect For the Beer.

Harry Greeman of 56 East Third street was married Saturday night to Sarah Herman in the Great Central Palace, at 96 Clinton street, where there was a dance afterward. About 2 o'clock yesterday morning Capt. O'Connor and Detective Eaton of the Delancey street station, who were passing the hall, heard the shrieks of men and women inside. They found the door locked and forced an entrance. "Arrest that man," said Special Police-

man Hesper, who is on duty at the hall, He pointed to the bridegroom. "What for?" asked the captain.

"He ordered two kegs of beer and would pay for but only one," said Hesper. The bridegroom was put under arrest for this alleged offense, in spite of the frantic appeal of the bride. She and half the weeping and wailing wedding guests followed the party to the station house. Greeman was bailed out and the party went back to the hall, but there were no more festivities. Greeman was arraigned yesterday in the Essex Market police court and most of the guests were spectators.

"What did you have this man arrested for?" asked Magistrate Wahle.

A CATHEDRAL PICNIC.

Children From the East Side Journey to Morningside Heights.

Sixty children, accompanied by Canon William Wier Gillies, vicar of Epiphany chapel in Stanton street, went on a picnic yesterday afternoon to the grounds of the Cathedral of St. John the Divine, Morningside Heights. The children were all from the Pro-Cathedral neighborhood on the East Side, and the expedition was the firs of a series to be given every Sunday afternoon in the summer.

A fund for this purpose was put in Bishop Potter's hands two or three years ago but not until this summer have the Cathedral grounds been in such a condition as to

make them a fit place for the purpose. The children brought their luncheons yesterday afternoon and were taken to Morningside Heights in trolley cars from the Bowery. They went in bunches of twenty. It was expected vesterday that 300 would go, but the thunderstorm, together with the fact that the outing plan is not yet generally understood, kept many away. The little handful that did go had a jolly go-as-you-please time of it romping under the trees, on the grass, until 5 o'clock, when

Archdeacon Nelson conducted open air services and made a short address. This open air 5 o'clock service on Sun-days, when the weather is fit, will during the summer take the place of the regular 4 o'clock service which heretofore on Sun-days has been held in the Cathedral crypt.

NEW CONEY CHURCH DEDICATED. Parish That Once Worshiped in Beer Hall Now Flourishing.

Bishop McDonnell, of Brooklyn dedicated the new Church of the Guardian Angel at Coney Island yesterday morning. He was assisted by his secretary, Mgr. Barrett and the pastor, the Rev. John J. Cullen-The sermon was preached by the Rev. William T. McGuirl, rector of St. Michael's. The parish of the Guardian Angel was established in 1880 by the Rev. James McKiverkin, now chaplain of St. Mary's Hos pital. He said his first masses in a build-ing at West Third street and Park place. Of afternoons and evenings this same place was used as a beer garden and concert hall.

Father Cullen came to the parish in 1893 and found it in debt \$10,000. He paid this off and began plans for a new church edifice. The new building cost \$65,000.

Mr. McDermott a Little Hard to Pull Out of the River.

A tall man wearing a silk hat and a sack coat walked up and down the pier at the foot of West Nineteenth street yesterday afternoon, stopping women and asking them what time it was. One of the women told Policeman O'Connell about it and he started for the man, who thereupon jumped off the pier into the river. Olaf Boordsen, a Norwegian bargeman, went after him in a rowboat and got him. Then the rescued man upset the boat. O'Connell got another boat and got the two. The tall man was sent to Bellevue. He said he was James McDermott, a drummer.

Frederick W. Vanderbilt's steam yacht the Warrior made her first appearance yesterday in New York waters, arriving from Marseilles by way of Gibraltar. She was designed by George L. Watson and was built last year at the yards of the Ailsa Shipbuilding Company at Troon, Scotland. She is 239 feet long and of 1,196 tons displacement. She is painted white and has two slender pole masts. She averaged about fourteen knots on the voyage, but can make sixteen. Mr. Vanderbilt and a party of friends cruised in her last winter in the Mediterranean. She came over in charge of her skipper, Capt. McLean. She has a crew of forty-six men.
